

Applying for governmental freqs. thru one pool would be a lot easier than two. Right now we send the applications to APCO \$190.00 & pay that fee. Then they can't find the freq so they have to go thru ASHTO \$230.00 to get the 1 watt freq. Total \$420.00! Why cant I just go straight to ASHTO and saved the \$190.00? Remember this is for a governmental agency why should they have to pay two different coordinators?
